

KESWICK MOUNTAIN FESTIVAL

17-19 MAY

ACTIVITIES

The activities will be a mix of things taking place in the gazebo and out in the nearby woodland and fields.

Exploring the local woodland and fields

- 🍂 Bug Hunt and Wildlife Walk – a general hunt for bugs and minibeasts. We will be giving families pots and guides to help them to find and identify small bugs and beasties living in the local fields and woodlands.
- 🍂 Lovely Lichens Walk – April Windle, Senior Project Officer for Plantlife will introduce people to the fascinating world of lichens.
- 🍂 Tiny Woodland Plants Walk – Join April and CBDC to find out about small woodland plants. If we come across any bugs we may collect them and take them back to the Biolab.

In the gazebo

- 🍂 Discovering Moths – Join Guy Broome to take a close look and be inspired by the beauty of moths and other insects trapped locally the previous night in Keswick.
- 🍂 Dung Beetle Super Heroes – Learn about how dung beetles can help farmers and climate change. CBDC will be bringing dung, gloves and everything you need to find and identify a dung beetle.
- 🍂 Wild and Wonderful crafts – Cumbria Wildlife Trust will get you thinking about “30 days Wild” a national campaign to do something wild every day in June 2019.

BioLab – throughout KMF

- 🍂 Microscopes and identification guides will be available to encourage people to take a closer look at wildlife they have found on the walks or on the site.
- 🍂 People on the walks will be encouraged to bring back things they find (to be released back to where they came).
- 🍂 We will try to identify things brought to us by members of the public including photographs.
- 🍂 A display of the interesting things that people have found at KMF.

PROGRAMME

Time	17th		18		19	
9:00			Bio lab	Discovering Moths	Bio lab	Discovering Moths
